

AURUM

IMAGE ASSET CATALOGUE

23 ASSETS · 15 SUPPLIED FRAMES · 8 DERIVED CROPS

STATUS

Every asset in this catalogue is a placeholder. All of them are upscaled from roughly 340px frames embedded in the supplied AURUM-INDIVIDUAL-IMAGES.pdf, which is a catalogue rather than a delivery package. 8 of the 23 slots have no source frame at all and are art-directed crops of a related picture. They read acceptably at the sizes the site uses, but they are not true high-resolution photography. Every file needs replacing with the real original before any public launch.

HERO

FILENAME

hero.webp

SECTION

01 — Hero

DIMENSIONS

3840 × 2160 px

ASPECT RATIO

16:9

SOURCE

Page 1 of the supplied PDF

PURPOSE

Full-bleed opening frame. Scales 1.15 to 1.6 and rotates behind the pinned headline.

GENERATION PROMPT

Ultra-wide cinematic architectural photograph, a cantilevered glass and blackened-steel residence perched above a still alpine lake, colossal moon low on the horizon, layered mountain ridges in atmospheric haze, blue hour with a thin band of warm amber light, anamorphic lens, deep shadows, dark editorial colour grading, 8k, no people

REPLACEMENT INSTRUCTIONS

Deliver WebP at quality 90, 3840 × 2160 or larger, named exactly "hero.webp", and drop it into public/images/ over the placeholder. The manifest key "hero" already points at that filename, so nothing else needs editing.

Hold the 16:9 ratio - ImageFrame renders with fill + object-cover, so a wrong ratio silently crops rather than breaking layout. If the ratio must change, update width and height in src/lib/images.ts.

The current file is upscaled from a ~340px catalogue thumbnail. Supply the true high-resolution original.

Cantilevered glass residence above an alpine lake at blue hour

HERO REVEAL

DERIVED CROP — NO SOURCE FRAME OF ITS OWN

FILENAME

hero-reveal.webp

SECTION

01 — Hero (circle reveal)

DIMENSIONS

3840 × 2160 px

ASPECT RATIO

16:9

SOURCE

Derived crop of page 6 of the supplied PDF (1.45x crop, east)

PURPOSE

Second frame revealed through the expanding circle() clip-path in hero phase 05.

GENERATION PROMPT

Cinematic architectural photograph, a black-bottom infinity pool merging with a mirror-still lake at sunset, low sculptural travertine terrace, a single olive tree, warm gold rim light on water, mountains dissolving into haze, anamorphic flare, dark moody grade, 8k, no people

REPLACEMENT INSTRUCTIONS

Deliver WebP at quality 90, 3840 x 2160 or larger, named exactly "hero-reveal.webp", and drop it into public/images/ over the placeholder. The manifest key "hero-reveal" already points at that filename, so nothing else needs editing.

Hold the 16:9 ratio - ImageFrame renders with fill + object-cover, so a wrong ratio silently crops rather than breaking layout. If the ratio must change, update width and height in src/lib/images.ts.

PRIORITY: this slot has no dedicated source frame. It needs a genuinely new photograph, not a re-crop.

Infinity pool terrace opening onto a sunset lake

NATURE

FILENAME

nature.webp

SECTION

02 — Nature / Philosophy

DIMENSIONS

3200 × 2400 px

ASPECT RATIO

4:3

SOURCE

Page 2 of the supplied PDF

PURPOSE

Sits behind the word NATURE; revealed through letter-shaped SVG masks, then goes full-bleed.

GENERATION PROMPT

Cinematic photograph looking through a monumental circular opening cut in a raw concrete wall onto a sunlit mountain valley with pines and a glacial lake, a single linen chaise inside the shadowed foreground, god rays, warm light against cold stone, architectural digest, 8k, no people

REPLACEMENT INSTRUCTIONS

Deliver WebP at quality 90, 3200 x 2400 or larger, named exactly "nature.webp", and drop it into public/images/ over the placeholder. The manifest key "nature" already points at that filename, so nothing else needs editing.

Hold the 4:3 ratio - ImageFrame renders with fill + object-cover, so a wrong ratio silently crops rather than breaking layout. If the ratio must change, update width and height in src/lib/images.ts.

The current file is upscaled from a ~340px catalogue thumbnail. Supply the true high-resolution original.

Circular stone portal framing a mountain valley

Villa terraced into a Mediterranean cliff face at dusk

RESIDENCE CLIFF

FILENAME

residence-cliff.webp

SECTION

03 — Residences

DIMENSIONS

1800 × 2400 px

ASPECT RATIO

3:4

SOURCE

Page 3 of the supplied PDF

PURPOSE

Panel 1 of the pinned horizontal gallery. Rotated -4deg, partially clipped.

GENERATION PROMPT

Vertical cinematic photograph of a modernist villa terraced into an Amalfi cliff face at dusk, warm interior light spilling from full-height glazing, cypress trees, dark sea below, distant coastal lights, moody film grade, medium format, 8k, no people

REPLACEMENT INSTRUCTIONS

Deliver WebP at quality 90, 1800 x 2400 or larger, named exactly "residence-cliff.webp", and drop it into public/images/ over the placeholder. The manifest key "residence-cliff" already points at that filename, so nothing else needs editing.

Hold the 3:4 ratio - ImageFrame renders with fill + object-cover, so a wrong ratio silently crops rather than breaking layout. If the ratio must change, update width and height in src/lib/images.ts.

The current file is upscaled from a ~340px catalogue thumbnail. Supply the true high-resolution original.

Blackened timber house among old-growth conifers in mist

RESIDENCE FOREST

FILENAME

residence-forest.webp

SECTION

03 — Residences

DIMENSIONS

1800 × 2400 px

ASPECT RATIO

3:4

SOURCE

Page 4 of the supplied PDF

PURPOSE

Panel 2 of the pinned horizontal gallery. Rotated +2deg.

GENERATION PROMPT

Vertical cinematic photograph of a blackened-timber and glass house set among old-growth conifers in low mist, soft directional dawn light, deep greens desaturated to near-monochrome, one warm lit window, Pacific Northwest, 8k, no people

REPLACEMENT INSTRUCTIONS

Deliver WebP at quality 90, 1800 x 2400 or larger, named exactly "residence-forest.webp", and drop it into public/images/ over the placeholder. The manifest key "residence-forest" already points at that filename, so nothing else needs editing.

Hold the 3:4 ratio - ImageFrame renders with fill + object-cover, so a wrong ratio silently crops rather than breaking layout. If the ratio must change, update width and height in src/lib/images.ts.

The current file is upscaled from a ~340px catalogue thumbnail. Supply the true high-resolution original.

Whitewashed cliff residence above the Aegean at golden hour

RESIDENCE OCEAN

FILENAME

residence-ocean.webp

SECTION

03 — Residences

DIMENSIONS

1800 × 2400 px

ASPECT RATIO

3:4

SOURCE

Page 5 of the supplied PDF

PURPOSE

Panel 3 — the dominant centre frame that all panels collapse into.

GENERATION PROMPT

Vertical cinematic photograph of a sculptural whitewashed residence on an Aegean cliff at golden hour, curved parapets, deep blue sea, long shadows, warm amber sun low in frame, editorial travel photography, 8k, no people

REPLACEMENT INSTRUCTIONS

Deliver WebP at quality 90, 1800 x 2400 or larger, named exactly "residence-ocean.webp", and drop it into public/images/ over the placeholder. The manifest key "residence-ocean" already points at that filename, so nothing else needs editing.

Hold the 3:4 ratio - ImageFrame renders with fill + object-cover, so a wrong ratio silently crops rather than breaking layout. If the ratio must change, update width and height in src/lib/images.ts.

The current file is upscaled from a ~340px catalogue thumbnail. Supply the true high-resolution original.

Monolithic desert pavilion between dunes at sunset

RESIDENCE DESERT

FILENAME

residence-desert.webp

SECTION

03 — Residences

DIMENSIONS

1800 × 2400 px

ASPECT RATIO

3:4

SOURCE

Page 6 of the supplied PDF

PURPOSE

Panel 4 of the pinned horizontal gallery. Rotated +5deg, heaviest blur at rest.

GENERATION PROMPT

Vertical cinematic photograph of a monolithic sand-toned concrete pavilion between towering dunes at sunset, long raking shadows, fine airborne dust catching light, reflecting pool at its base, minimal and severe, 8k, no people

REPLACEMENT INSTRUCTIONS

Deliver WebP at quality 90, 1800 x 2400 or larger, named exactly "residence-desert.webp", and drop it into public/images/ over the placeholder. The manifest key "residence-desert" already points at that filename, so nothing else needs editing.

Hold the 3:4 ratio - ImageFrame renders with fill + object-cover, so a wrong ratio silently crops rather than breaking layout. If the ratio must change, update width and height in src/lib/images.ts.

The current file is upscaled from a ~340px catalogue thumbnail. Supply the true high-resolution original.

Glass chalet on a snow ridge beneath alpine peaks

RESIDENCE MOUNTAINS

FILENAME

residence-mountains.webp

SECTION

03 — Residences

DIMENSIONS

1800 × 2400 px

ASPECT RATIO

3:4

SOURCE

Page 7 of the supplied PDF

PURPOSE

Panel 5 of the pinned horizontal gallery. Rotated -3deg.

GENERATION PROMPT

Vertical cinematic photograph of a glass and dark-stone chalet on a snow ridge beneath jagged alpine peaks, cold blue shadow with a single warm interior glow, blowing spindrift, high contrast, Swiss Valais, 8k, no people

REPLACEMENT INSTRUCTIONS

Deliver WebP at quality 90, 1800 x 2400 or larger, named exactly "residence-mountains.webp", and drop it into public/images/ over the placeholder. The manifest key "residence-mountains" already points at that filename, so nothing else needs editing.

Hold the 3:4 ratio - ImageFrame renders with fill + object-cover, so a wrong ratio silently crops rather than breaking layout. If the ratio must change, update width and height in src/lib/images.ts.

The current file is upscaled from a ~340px catalogue thumbnail. Supply the true high-resolution original.

EXPERIENCE SPA

FILENAME

experience-spa.webp

SECTION

04 — Experiences

DIMENSIONS

2600 × 2600 px

ASPECT RATIO

1:1

SOURCE

Page 8 of the supplied PDF

PURPOSE

Fills the growing circle() mask; also the WELLNESS & SPA orbiting node.

GENERATION PROMPT

Cinematic photograph of a dark basalt thermal bath in a vaulted stone chamber, a single circular oculus casting a shaft of warm light onto steaming water, ripples, minimal, deeply atmospheric, wet stone reflections, 8k, no people

REPLACEMENT INSTRUCTIONS

Deliver WebP at quality 90, 2600 x 2600 or larger, named exactly "experience-spa.webp", and drop it into public/images/ over the placeholder. The manifest key "experience-spa" already points at that filename, so nothing else needs editing.

Hold the 1:1 ratio - ImageFrame renders with fill + object-cover, so a wrong ratio silently crops rather than breaking layout. If the ratio must change, update width and height in src/lib/images.ts.

The current file is upscaled from a ~340px catalogue thumbnail. Supply the true high-resolution original.

Dark stone thermal bath under an oculus of light

EXPERIENCE YACHT

FILENAME

experience-yacht.webp

SECTION

04 — Experiences

DIMENSIONS

1600 × 1600 px

ASPECT RATIO

1:1

SOURCE

Page 9 of the supplied PDF

PURPOSE

YACHT JOURNEYS orbiting node.

GENERATION PROMPT

Cinematic aerial photograph of a dark sailing yacht crossing a molten gold sun-path on deep blue open sea at sunset, long lens compression, glittering specular highlights, minimal horizon, 8k, no people

REPLACEMENT INSTRUCTIONS

Deliver WebP at quality 90, 1600 x 1600 or larger, named exactly "experience-yacht.webp", and drop it into public/images/ over the placeholder. The manifest key "experience-yacht" already points at that filename, so nothing else needs editing.

Hold the 1:1 ratio - ImageFrame renders with fill + object-cover, so a wrong ratio silently crops rather than breaking layout. If the ratio must change, update width and height in src/lib/images.ts.

The current file is upscaled from a ~340px catalogue thumbnail. Supply the true high-resolution original.

Yacht silhouette on a sun-path at open sea

EXPERIENCE DINING

DERIVED CROP — NO SOURCE FRAME OF ITS OWN

FILENAME

experience-dining.webp

SECTION

04 — Experiences

DIMENSIONS

1600 × 1600 px

ASPECT RATIO

1:1

SOURCE

Derived crop of page 10 of the supplied PDF (1.55x crop, east)

PURPOSE

PRIVATE DINING orbiting node.

GENERATION PROMPT

Cinematic photograph of a long dark oak table set for two in a raw stone dining room, candlelight and a single pendant, deep shadow, linen and hand-thrown ceramics, warm amber pools of light, Nordic fine dining, 8k, no people

REPLACEMENT INSTRUCTIONS

Deliver WebP at quality 90, 1600 x 1600 or larger, named exactly "experience-dining.webp", and drop it into public/images/ over the placeholder. The manifest key "experience-dining" already points at that filename, so nothing else needs editing.

Hold the 1:1 ratio - ImageFrame renders with fill + object-cover, so a wrong ratio silently crops rather than breaking layout. If the ratio must change, update width and height in src/lib/images.ts.

PRIORITY: this slot has no dedicated source frame. It needs a genuinely new photograph, not a re-crop.

Candlelit private dining table in a dark stone room

EXPERIENCE CULTURAL

DERIVED CROP — NO SOURCE FRAME OF ITS OWN

FILENAME

experience-cultural.webp

SECTION

04 — Experiences

DIMENSIONS

1600 × 1600 px

ASPECT RATIO

1:1

SOURCE

Derived crop of page 2 of the supplied PDF (1.5x crop, west)

PURPOSE

CULTURAL IMMERSION orbiting node.

GENERATION PROMPT

Cinematic photograph of an ancient stone colonnade at low golden hour, receding arches, dust in the light shafts, weathered limestone texture, deep shadow between columns, archaeological and reverent, 8k, no people

REPLACEMENT INSTRUCTIONS

Deliver WebP at quality 90, 1600 x 1600 or larger, named exactly "experience-cultural.webp", and drop it into public/images/ over the placeholder. The manifest key "experience-cultural" already points at that filename, so nothing else needs editing.

Hold the 1:1 ratio - ImageFrame renders with fill + object-cover, so a wrong ratio silently crops rather than breaking layout. If the ratio must change, update width and height in src/lib/images.ts.

PRIORITY: this slot has no dedicated source frame. It needs a genuinely new photograph, not a re-crop.

Ancient stone colonnade in low golden light

ARCHITECTURE 01

FILENAME

SECTION

08 — Final reveal

DIMENSIONS

3840 × 2160 px

ASPECT RATIO

16:9

SOURCE

Derived crop of page 3 of the supplied PDF (1.3x crop, west, graded cool)

PURPOSE

Collapses circle to ellipse to vertical slit to black, before the end-credit logo.

GENERATION PROMPT

Cinematic photograph of a vast calm ocean under a full moon, a single silver light-path across the water, faint clouds, no land, near-monochrome blue-black with a cold silver highlight, meditative and final, 8k

REPLACEMENT INSTRUCTIONS

Deliver WebP at quality 90, 3840 x 2160 or larger, named exactly "final.webp", and drop it into public/images/ over the placeholder. The manifest key "final" already points at that filename, so nothing else needs editing.

Hold the 16:9 ratio - ImageFrame renders with fill + object-cover, so a wrong ratio silently crops rather than breaking layout. If the ratio must change, update width and height in src/lib/images.ts.

PRIORITY: this slot has no dedicated source frame. It needs a genuinely new photograph, not a re-crop.

Moonlit ocean horizon under a vast sky

REPLACING THESE ASSETS

01 Shoot or generate the real frame

Work from the GENERATION PROMPT on that asset's page. Match the aspect ratio exactly and meet or exceed the listed pixel dimensions from a true original - never an upscale.

02 Grade it bold, not dark

Raised saturation and contrast, one warm key light against cold ambient shadow. Do NOT darken. The site lays no dark scrim over photography any more, so what is in the file is what the visitor sees.

03 Export WebP, quality 90

Use the exact filename from the FILENAME line. Filenames are the contract between the file and the manifest.

04 Drop it into public/images/

Overwrite the placeholder in place. The manifest key already points at that filename, so no code change is needed.

05 Only if the ratio changed

Update width and height for that entry in src/lib/images.ts. ImageFrame renders with fill + object-cover, so a mismatched ratio silently crops instead of erroring.

06 Do not re-run the import script

scripts/import-source-images.mjs rewrites the whole of public/images and regenerates src/lib/image-blur.ts. Running it after you have dropped in real photography will destroy it.

SHARED PALETTE

	ink	#05060a
	obsidian	#0a0b10
	graphite	#14161c
	slate	#2a2d36
	ash	#6f6b62
